

# Computer Skills (Business)

Required – Semester – 9

Prerequisites: None

---

## Course Purpose

Computer Skills is designed to equip student with the tools they need to make use of God's rich blessing of technology.

Students will learn how to apply these skills to their lives as Christians.

Students will gain hands-on real world experience in developing skills in word processing, spreadsheet creation, and presentation software.

The course will also study how computers and peripherals work.

## Course Objectives

The successful student will:

- Understand the blessings of technology and how to use it to the glory of God
- Develop the skills necessary to maximize their God-given potential.
- Possess a working understanding of computers and their various applications
- Understand how to navigate the Windows operating system efficiently
- Possess a working knowledge of Microsoft Office and its various components
- Prepare and present projects in Microsoft Word, Excel, and PowerPoint
- Demonstrate an ability to integrate the three above mentioned programs

## Course Outline

- Introduction to Computers
- Introduction to Windows
- Microsoft Word – Three Chapters
- Microsoft Excel – Three Chapters
- Microsoft PowerPoint – Three Chapters
- Final Project

## Instructional Strategies

Chapter Projects

- Students will follow specific step by step textbook instructions to create assignments.
- Grades are based on accuracy.

Cases and Places

- Students follow general guidelines to create their own assignments.
- Grades are based on accuracy and creativity.
